

SAP SAILING INSTRUCTIONS

Dear ORC and Platu 25 skippers,

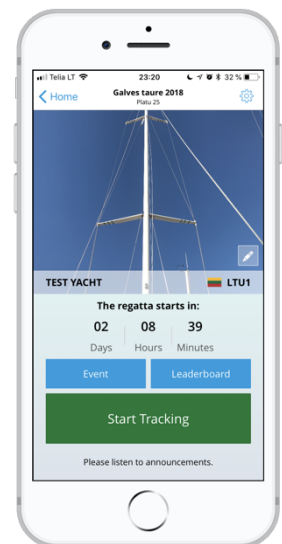

This year, in the regatta for the first time in Lithuania, we will use “SAP Sailing” - the most advanced sailing system. Benefits:

- Maximum precise tracker
- Detailed statistics of the regatta
- Analysis of performance at the finish: yacht trajectory, speed, number of manoeuvres
- The ability to compare results with other participants
- Analysts after finish in preparation for a new start

Before the start of regatta, you will receive email with the invitation to join “SAP Sailing”, then you need:

1. download “SAP Sailing” application (links will be in email too)

iOS	Android
http://bit.ly/ios-sap-sailing	http://bit.ly/android-sap-sailing
	

2. Scan QR code that you will find in email (or click “Start App” in the email you received)
3. **During regatta** – click “Start Tracking”
4. **Ensure** your mobile phone is charged and on during all regatta races. This is very important, as the results will be like and the tracker helps ups determine both start and finish.

For application to work, please ensure that GPS is on, that you have mobile internet turn on at all time and the phone is charged. We strongly advice to take power-bank to help to ensure the phone is always on.
